# QUICK-START GUIDE

RELOOP RP-8000

serato | DJ

Installation And Setup

The Reloop RP-8000 is a class compliant USB plug and play device and requires no further driver installation.

NOTE: The Reloop RP-8000 is an additional controller that will only work in addition to supported Serato DJ hardware. Click here to see a list of supported Serato DJ hardware.

- Download and install the latest version of Serato DJ from http://serato.com/dj/downloads
- Connect your supported Serato DJ hardware to a USB port.
- Connect your Reloop RP-8000 to an available USB Port.
- Open Serato DJ.

#	Reloop RP-8000 control	Function

12	+/- 16	Change pitch range to +/- 16%. Press in conjunction with the "+/- 8" button to change the pitch range to +/-50%
13	LCD DISPLAY	Shows pitch information and used when selecting active deck
14	START/BRAKE	Turn to adjust the start and stop time of the platter
15	TORQUE	Turn to adjust the torque of the turntable

Performance Pads

The performance pads have 4 different basic modes you can select. The modes are; Hot Cue, Auto Loops, Sampler and User.

- HOT CUE Mode: Press "CUE" to activate this mode. When pressing performance pads 1-8 you can add and trigger up to 8 Cue Points.
- LOOP Mode: Press "LOOP" to activate this mode. When pressing buttons 1-8 you can activate an Auto Loop. The Loop Length ranges from 1/4 to 32 bars.
- SAMPLER Mode: Press "SAMPLER" to activate this mode. Pads 1-6 Trigger Samples loaded in your Sample Banks.
- SLICER Mode: Press "USER" to activate "SLICER MODE". A specified range (or domain) is divided into eight equal sections, and these eight sliced sections are assigned to the respective pads. Pads 1-8 will allow you to trigger each slice. Holding the USER button while using Pads 1 & 2, adjusts Quantization of the slicer function. The quantization can be set to: 1/8, 1/4, 1/2 and 1 beat/s. Holding the USER button while using Pads 7 & 8, adjusts the Domain. The domain can be set to: 2 beats, 4 beats, 8 beats, 16 beats, 32 beats or 64 beats.

You can also combine modes and use two functions at once by pressing CUE and LOOP, LOOP and SAMPLE or CUE and SAMPLE at the same time. The 8 pads will be divided with 4 pads for one function and 4 for another.

Connecting multiple RP-8000s

If you wish to connect multiple RP-8000s and have the MIDI functions control different decks in Serato DJ, each turntable needs to be connected to your computer with a USB cable. If your computer does not have enough available USB ports to accommodate all turntables, use a powered USB hub. Once they are both connected to your computer via USB:

- Hold down 'TRAX' knob of the deck you wish to change.
- The LCD screen will flash, and display 'CH-1' indicating it is controlling deck 1 in Serato DJ. The first of the eight MIDI control buttons will also be illuminated.
- Select the second button, and it will switch to 'CH-2'. This will make MIDI functions on the RP-8000 control deck 2.
- Repeat with any other available decks if connected

NOTE: Each time you power up your turntables you will need to repeat this process as it does not save these settings.

Using the Tool Tips

Click on the ⓘ icon to enable Tool Tips. This is located in be-tween the MIDI and setup button in the top right hand corner of the screen. Tool Tips provide a handy way to learn the various features of Serato DJ.

Move the mouse over a section of the screen to bring up a context sensitive tool tip. Holding the mouse over the ⓘ button with Tool Tips turned on will show you a list of all keyboard shortcuts.

For more information about how to use Serato DJ, please go to our website www.serato.com or refer to the Serato DJ Software Manual.

For more information on your controller, please refer to the hardware manual.
