Rane Twelve
Quick-Start Guide

serato DJ Pro

Setup

Serato Software

The Rane Twelve is a "Serato DJ Pro official accessory", meaning it works with Serato DJ Pro out of the box, but requires additional primary hardware connected, that falls under the Serato DJ Pro hardware unlocked or Paid upgrade to Serato DJ Pro categories.
Please ensure you have the latest version of Serato DJ Pro installed:

Driver Software

The Rane Twelve does not require manufacturer specific drivers on Mac or Windows operating systems, and is plug & play with Serato DJ Pro. If used in conjunction with a Rane Seventy-Two mixer, you may connect the Rane Twelve to it's dedicated USB accessory ports, otherwise simply connect it directly to a spare USB port on your computer, then connect your primary hardware, and launch Serato DJ Pro.
Ensure the virtual deck you wish to control in Serato DJ Pro is in Internal mode, and then press the Deck 1, 2, 3 or 4 buttons, to assume control of that deck. Once assigned, the corresponding Deck Select button will indicate this, by staying fully lit.
To reassign a deck, hold the corresponding Deck Select button for 2 seconds, allowing you to assign it again, which is useful when using multiple Rane Twelve devices.

Overview

#	RANE TWELVE CONTROL	FUNCTION
1	AC POWER IN	Connect AC adapter
2	POWER SWITCH	Turn device on/off
3	MOTOR TORQUE	Adjust platter torque
4	USB	Connect USB cable to PC / Mixer

Overview

#	RANE TWELVE CONTROL	FUNCTION
1	CUE MODE	Toggle between Cue pad mode (brightly lit) or Needle drop mode (dimly lit)
