Installation and Setup

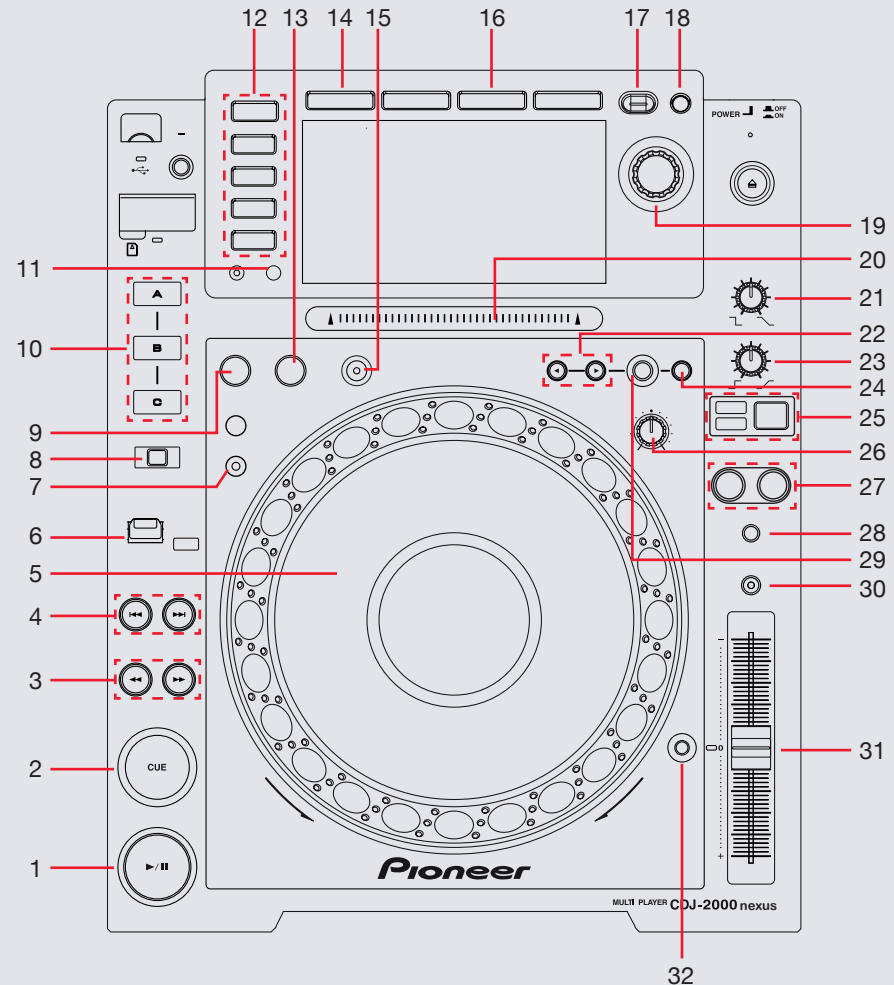

The Pioneer CDJ-2000nexus is a class compliant USB plug and play device for Mac, however requires drivers for Windows. You will find these on the installation CD that is provided with your CDJ-2000nexus, or as a download from the [Pioneer website](#).

To use a pair of CDJs with Scratch Live, you will need at least 3 available USB ports. If you don't have 3 ports available you may be able to connect your CDJs to a powered USB hub. It is however, important to always connect your Scratch Live hardware directly to your computer.

Please also ensure you have also installed the latest available version of [Scratch Live](#).

1. Connect your Scratch Live hardware as per normal into an available USB port on your computer.
2. Connect the CDJ to your computer via USB cable or USB hub.
3. Open Scratch Live.
4. Press the LINK button on the CDJ-2000nexus.
5. Press the Scroll Knob to connect to the computer.
6. Use the Scroll Knob to choose which virtual deck you wish the CDJ-2000nexus to control.
7. Set the virtual deck in Scratch Live to Internal mode (INT).

Your CDJ-2000nexus can also be used to play regular CDs. To do this just connect the CDJs audio outs (RCA) to your Scratch Live hardware as you would your regular CD players.

20	NEEDLE SEARCH	When track is paused or platter is held, touch the need search strip to scroll through track
21	TOUCH/BRAKE ADJUST	Adjust braking speed
22	CUE/LOOP CALL	Select Loop Slot
23	RELEASE/START ADJUST	Adjust starting speed
24	MEMORY	Saves the Loop to the current Loop Slot

25	JOG MODE	Toggles between jog or scratch mode for jog wheel
26	JOG ADJUST	Adjust platter sensitivity
27	BEAT SYNC	MIDI Mappable
28	TEMPO	Cycle through available tempo ranges
29	DELETE	Deletes current Loop
30	MASTER TEMPO	Keylock On/Off
31	TEMPO FADER	Adjust Tempo
32	TEMPO RESET	Reset Tempo to zero

MIDI

The MIDI control feature in Scratch Live provides the ability to map Scratch Live software functions to MIDI controller functions such as keyboards, triggers, sliders, and knobs. Integrating MIDI controllers into your Scratch Live setup can improve live performance usability, such as hitting pads on a MIDI controller to trigger Loops or Cue Points. Buttons marked as 'MIDI mappable' can be MIDI mapped to the Scratch Live function of your choice.

For further information on how to MIDI map Scratch Live software functions, download the Scratch Live manual.

NOTE: You can not change the functionality of other buttons by using MIDI control feature.

Using the Tool Tips

Click on the  icon to enable Tool Tips. This is located in between the MIDI and setup button in the top right hand corner of the screen. Tool Tips provide a handy way to learn the various features of Serato Scratch Live.

Move the mouse over a section of the screen to bring up a context sensitive tool tip. Holding the mouse over the  button with Tool Tips turned on will show you a list of all keyboard shortcuts.

For more information about how to use Scratch Live, please go to our website www.serato.com or download the [Serato Scratch Live Manual](#).

For more information on your CDJ-2000nexus, please refer to the [Pioneer CDJ-2000nexus manual](#).
