# Reloop Ready

## Quick-Start Guide

serato DJ Lite

# Setup

## Serato Software

The Reloop Ready is a "Serato DJ Lite hardware unlocked" device, meaning it works with Serato DJ Lite out of the box.
It is also a "paid upgrade to Serato DJ Pro device", meaning it requires the purchase & activation of a Serato DJ Pro license, in order to be used with Serato DJ Pro.
You can also try Serato DJ Pro, before making a purchase.

## Driver Software

The Reloop Ready does not requires manufacturer specific drivers on Mac computers. Windows computers require a device driver to be installed. This can be downloaded from **Reloop's website**.

| 23 | VINYL | Turn vinyl mode on/off for the respective plater | - |
| 24 | KEYLOCK | Enable and disable Key Lock for deck | - |

# Performance Pads

The Reloop Ready can make use of 4 performance pads in Serato DJ Lite. These pads can be used across 5 different performance pad modes. Pads 5 - 8 are assigned to transport controls. **PADS 5-8 (In Order)**: Revese, Rewind, Fast Forward, Stutter Play. These consist of:

**HOT CUE mode**: Hold the MODE button and press **PAD 1** to select HOT CUE mode. In this mode pads 1-4 trigger Serato DJ Lite Cue points, and if no Cue point is present on that slot/pad, pressing that pad will set a Cue point. Holding down the **SHIFT** button while pressing a pad will delete the Cue point from the respective pad/slot.

**AUTO LOOP mode**: Hold the MODE button and press **PAD 2** to select AUTO LOOP mode. Pads 1-4 trigger trigger an autoloop of variable sizes. Use the **PARAMETER** buttons to shift the loop left or right.

**MANUAL LOOP mode**: Hold the MODE button and press **PAD 3** to select MANUAL LOOP mode. In this mode, **PAD 1** sets the in point and **PAD 2** sets the out point. **PAD 3** will Enable/Disbale the loop and **PAD 4** will trigger Reloop.

**SAMPLER mode**: Hold the MODE button and press **PAD 4** to select SAMPLER mode. Press pads 1-4 in this mode to trigger samples loaded into the Serato DJ Pro Sampler.

**SCRATCH BANK** mode: Hold the **MODE** button while pressing the **PAD 7**, to enter Scratch Bank mode. This mode allows you to assign files in your Serato DJ Lite library to a Pad. When Pads 1-4 are triggered, the corresponding file will be loaded to deck, allowing you to quickly load useful Scratch samples.

Click the Scratch Bank button in the top tool bar of Serato DJ Lite to reveal the Scratch Bank Panel. In this panel you can load and eject files from the Scratch Banks. Holding **SHIFT**, while pressing a Scratch Bank Pad that is already loaded to a virtual deck, will reload the previously loaded track to that virtual deck.

# Help

## Show Tooltips

Click on the `Help ▾` button in the upper right-hand corner of Serato DJ Lite, then `ⓘ Show tooltips` to enable tooltips. Tool tips provide a handy way to learn the various features of Serato DJ Lite.

Move the mouse over a section of the screen to bring up a context sensitive tool tip.

## Watch Tutorials

Click on the `Help ▾` button in the upper right-hand corner of Serato DJ Lite, then `Watch tutorials` to launch your default internet browser and watch tutorials, to help you get familiar with Serato DJ Lite.

## Get Support

Click on the `Help ▾` button in the upper right-hand corner of Serato DJ Lite, then `Get support` to launch your default internet browser and navigate to the Serato DJ Lite knowledge base, where you can find helpful articles and guides on Serato DJ Lite. Alternatively, type in the `Search help` `Go` box, with keywords, to search the Serato DJ Lite knowledge base for specific, related topics.
